

RESIST+

Small size and Powerfull Linear fixture with Internal Driver and Various Mounting Options.

Resist+ with an internal driver is the perfect linear solution for various mounting options: ground, wall, ceiling, or suspension.

Up to 50 meters of fixtures can be connected in parallel, saving time and money in the installation process.

Resist+ offers multiple light distributions: narrow, medium, wide, and wall grazing. The fixture can be installed vertically or horizontally and together with its +/- 90° tilt option, a 360° rotation can be achieved.

Resist+ is available with white light and RGBW.
